

The 
Good Life
by  OGO

With Canary Island roots and located in Valencia, we want to share our innate passion for the sea, the sun and people

We know you love to travel, discover, and enjoy; we know you love the summer sun and the winter chill, the comfort of home and the great outdoors, and we want to be a part of all this and more.

Disconnect from the world while you connect with what truly matters, with what makes you happy: family, friends, and yourself.

100% designed and manufactured in Spain

Products specially designed for
resting, relaxing, and enjoying
good times both at home and
outdoors, even by the pool.

Starfish by OGO

The perfect
complement

A high-angle, top-down photograph of a person swimming in clear, turquoise water. The person is wearing a purple swimsuit and is positioned in the lower half of the frame. To the left and right of the person are two inflatable rings: a red one on the left and a grey one on the right. The water is very clear, showing the person's legs and the bottom of the rings. The overall scene is bright and sunny, suggesting a beach or pool setting.

A product designed
for enjoyment

Splash!

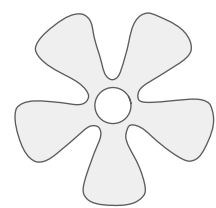

A collection of designer products made from a technical fabric that allows for use in the pool (Agora 3D). Its design, texture, and colors enable use in any residential space (In&Out: Interior, Open Air, and Splash!).

It is recommended to rinse off excess chlorine or salt after relaxing or having fun in the pool to ensure proper maintenance. The product significantly increases in weight when used in the pool, requiring 2 or 3 people, depending on its size, to remove it.

Fabrics & Fillings

The quality and durability of our fabrics and fillings are also important principles for our design team in order to offer unique products. The experience and feedback from our suppliers confirm this commitment.

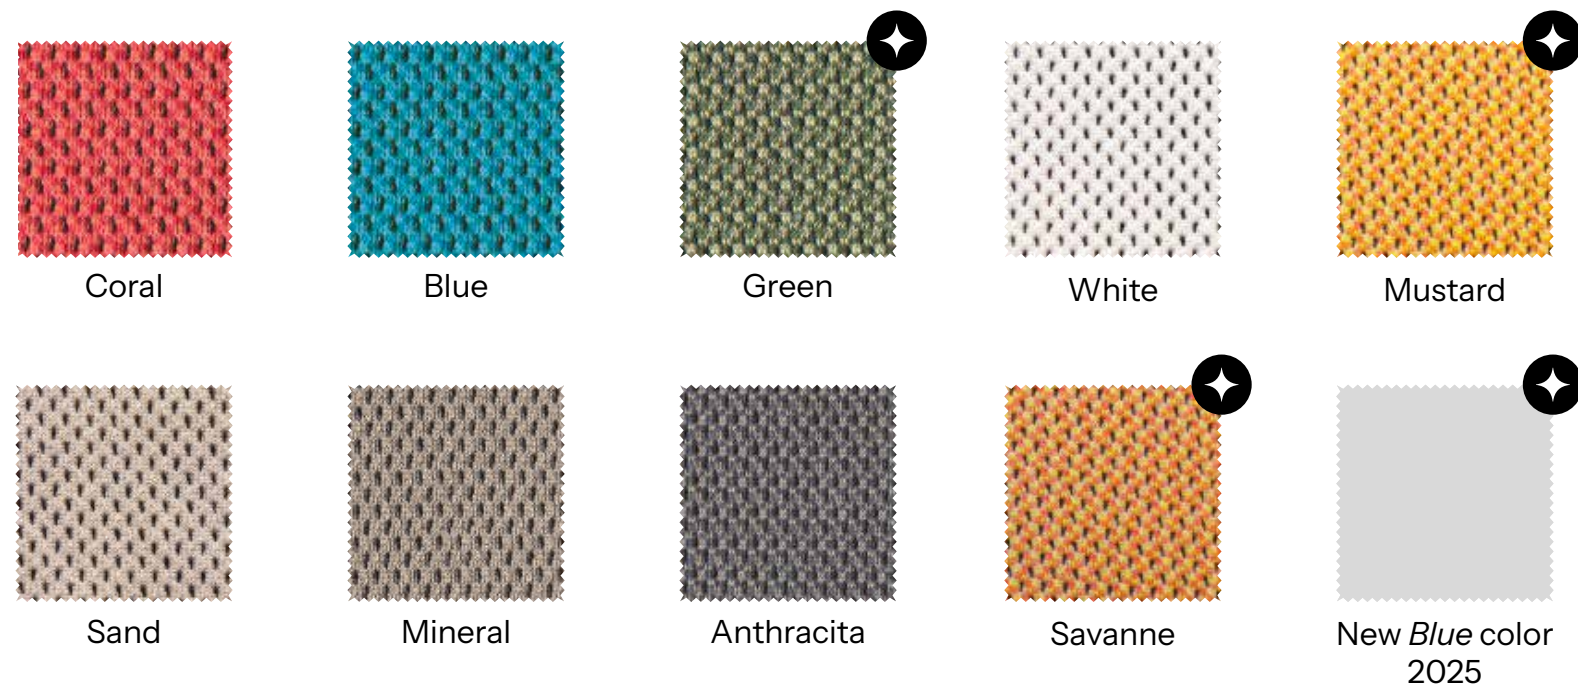

Agora 3D

(agora)[®]

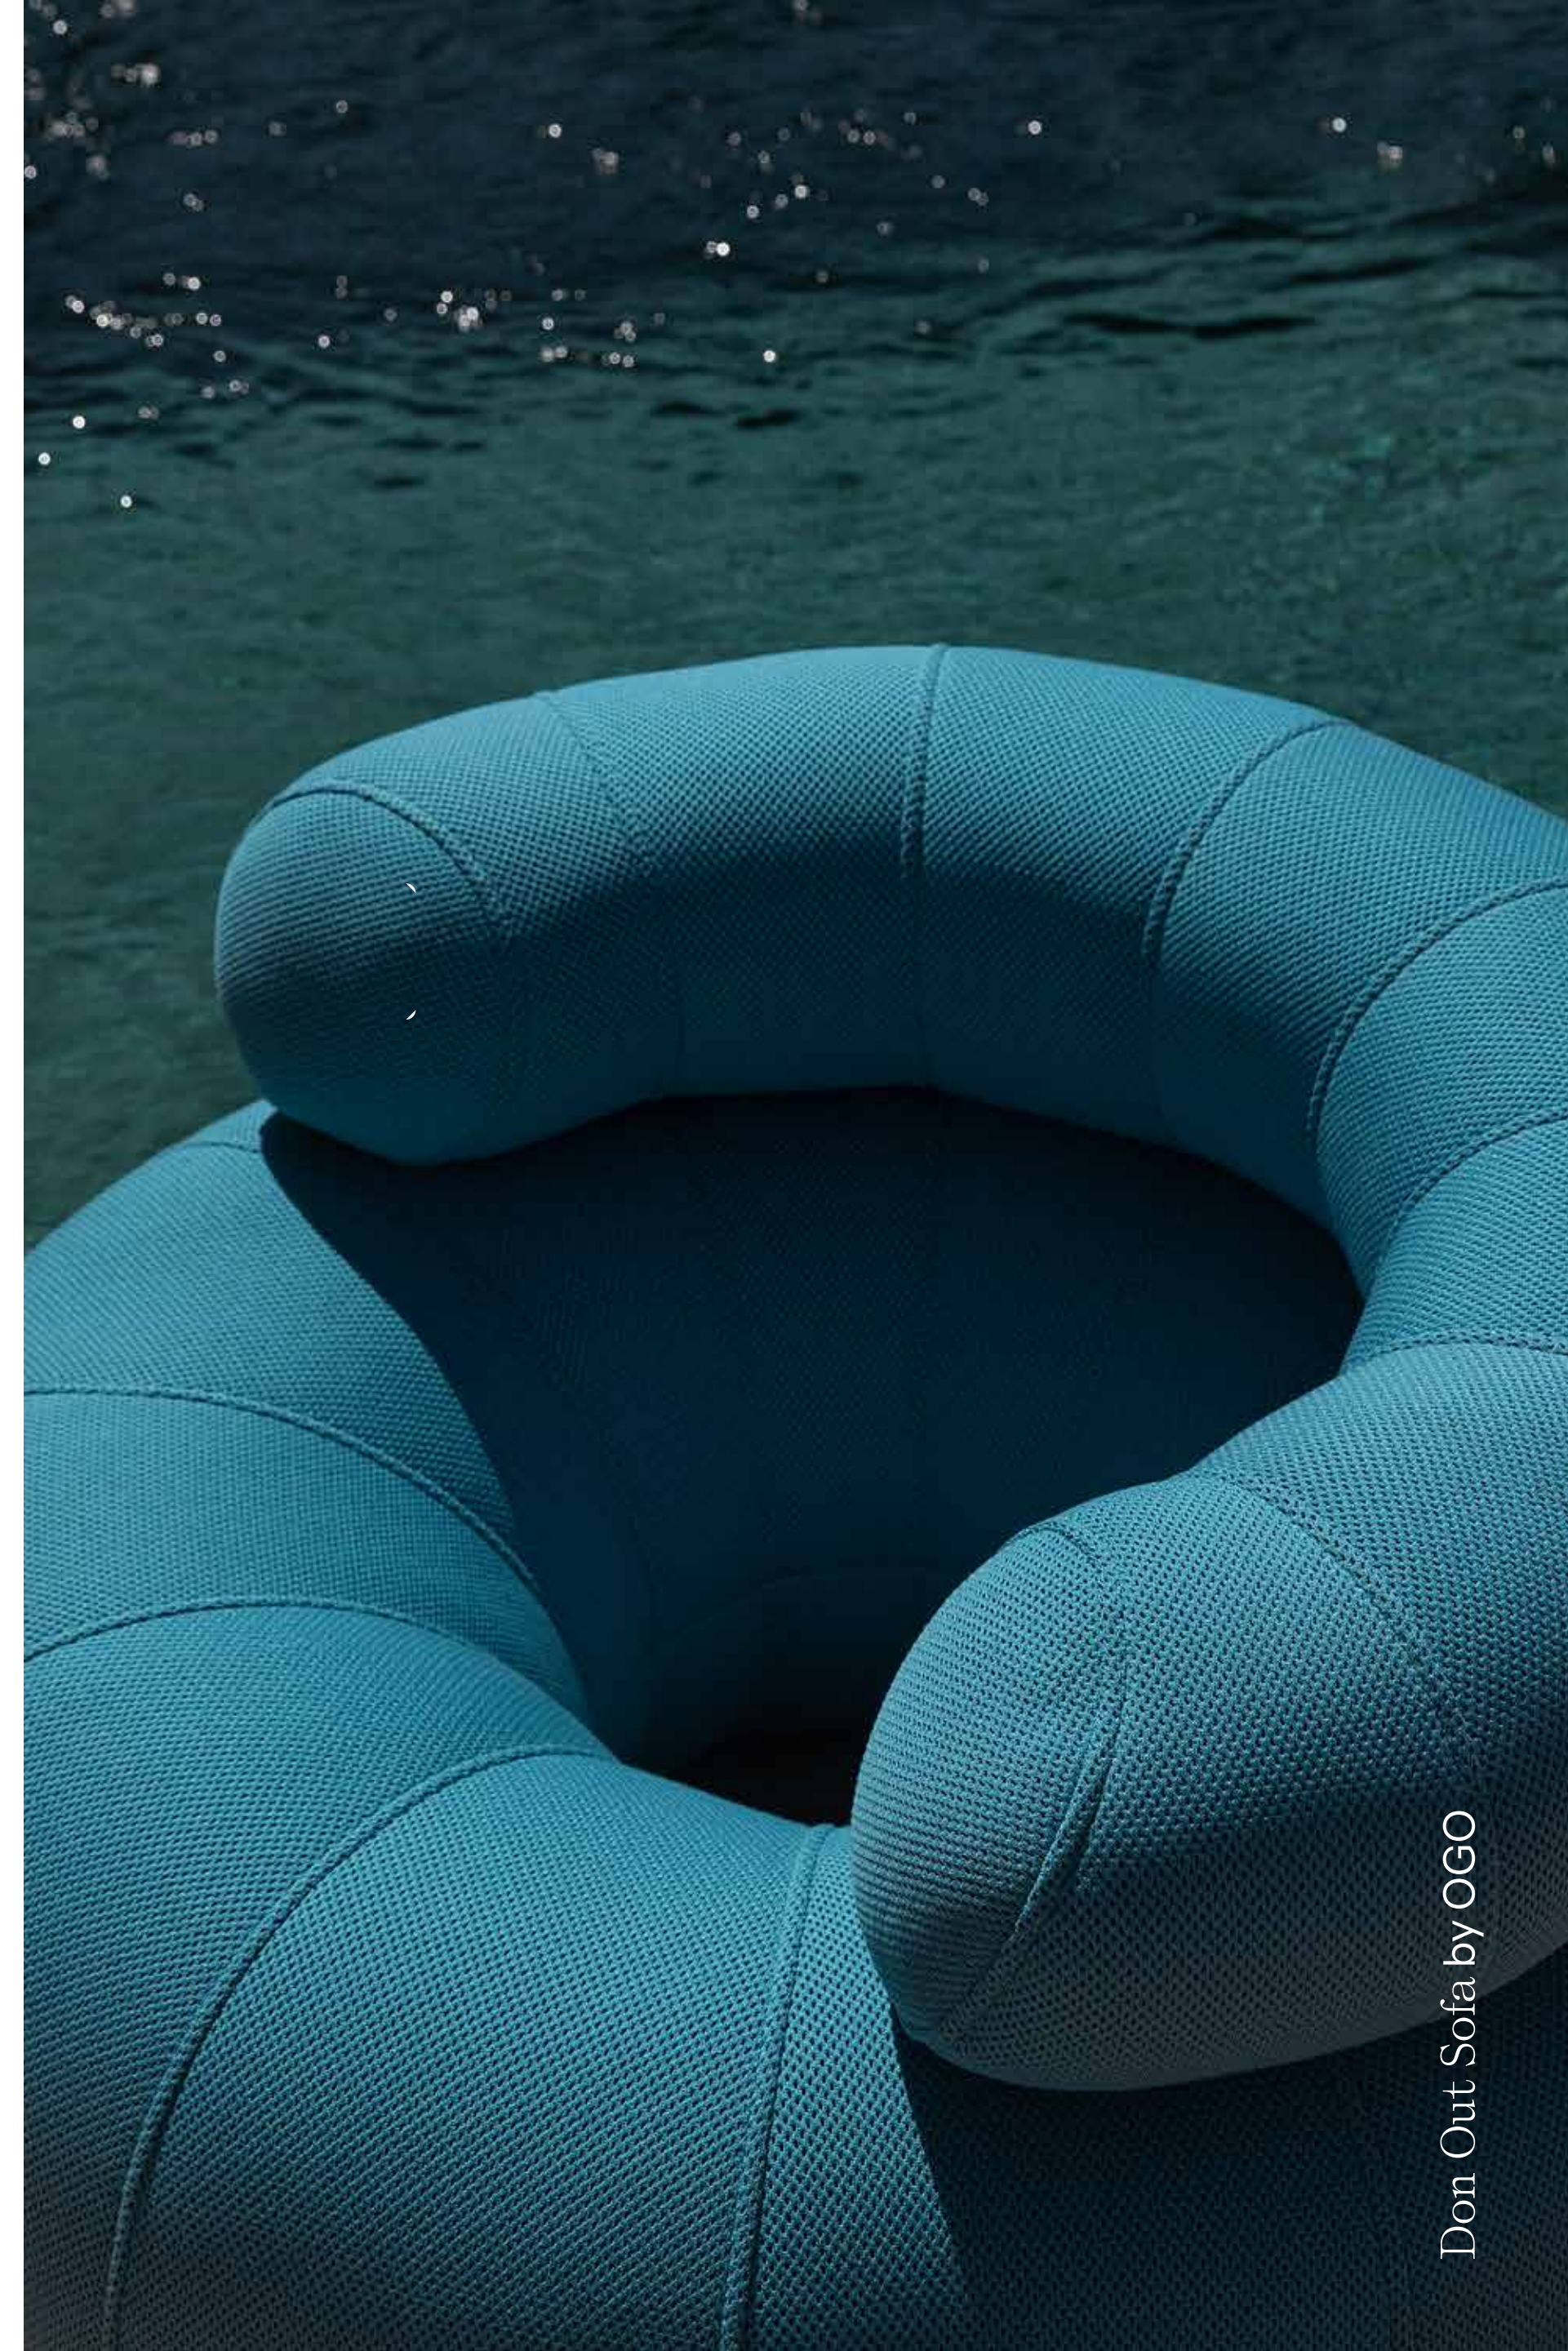

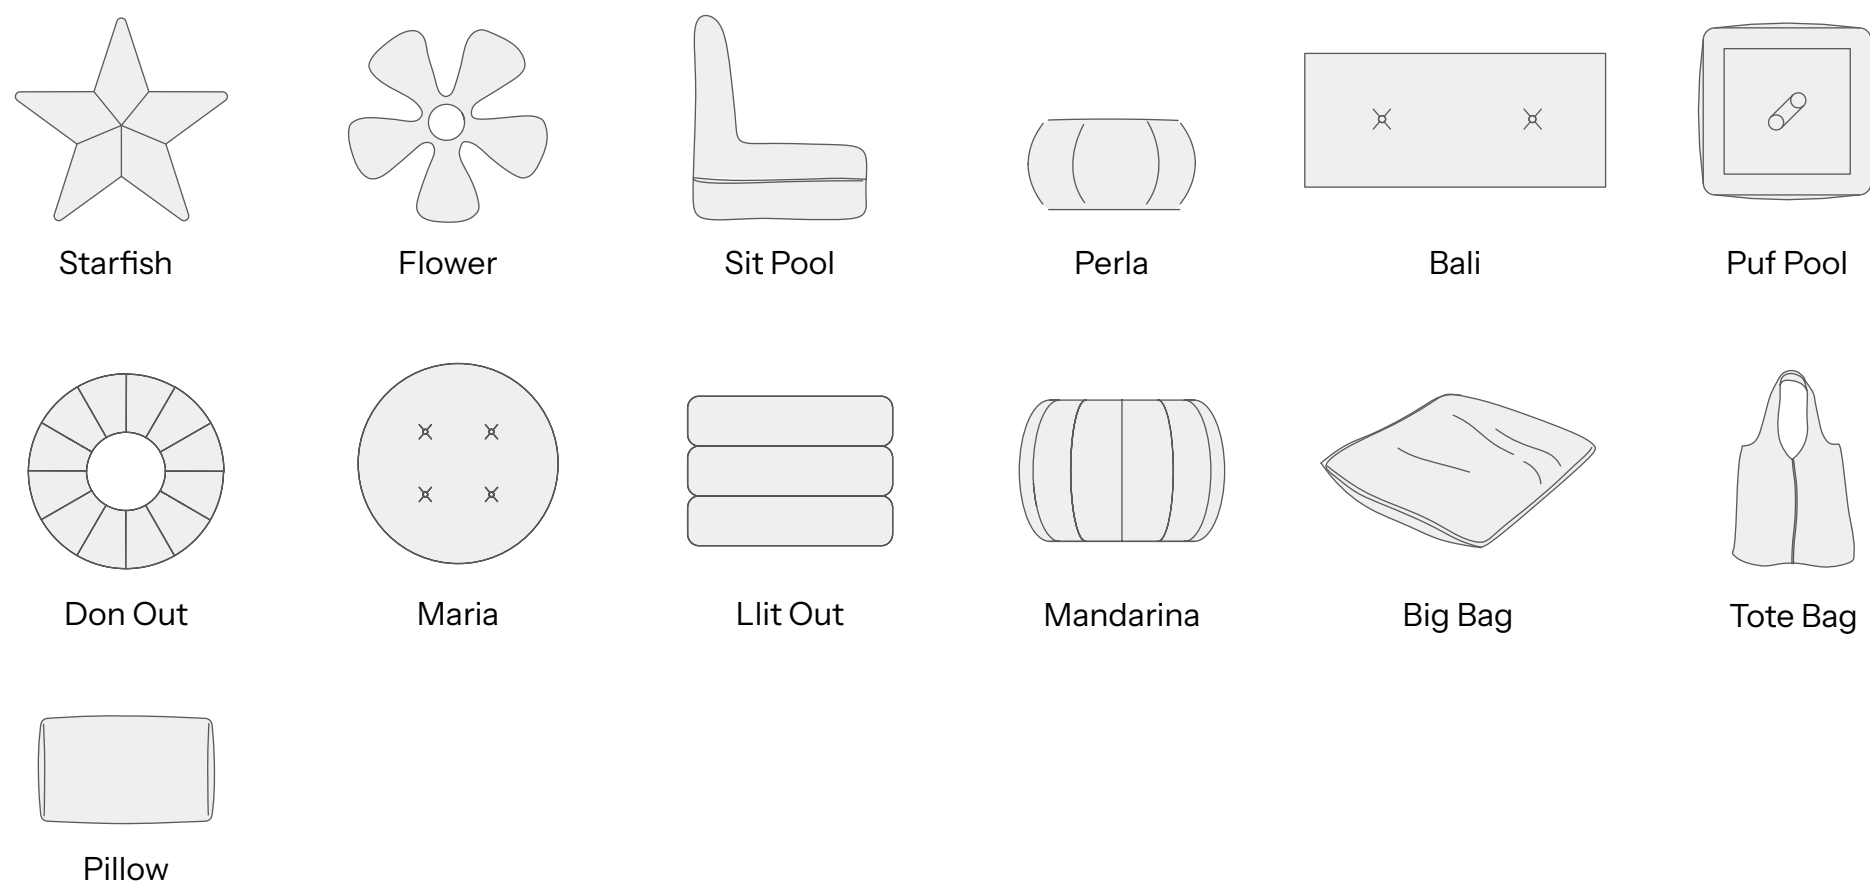

Three-dimensional fabric made from dyed yarn, resistant to high temperatures that guarantees color retention for 5 years and is 100% drainable and breathable, allowing the products to be used in water 🌊

Colours

★ Exclusive OGO colors

Available products

The Agora 3D fabric is our *distinguishing* feature, manufactured with the premise of creating a product that can be used *underwater* 🌊, for the Splash! section

The combination of Agora 3D fabric with 100% cork pearl filling allows the product to float and be rinsed and dried after use. The fabric's structure enables water to drain and evaporate.

During winter, it should be stored completely dry in its protective cover.

- ❗ For indoor use, it is filled with a mixture of shredded foam rubber and EPS BIOPS in a proportion of 70%/30%, respectively

A step forward towards sustainability

Relleno BIOPS by OGO

BIOPS, sustainable beads filling

Our quality
fillings

BIOPS  by OGO

This new material is an expression of circular economy, while maintaining the same performance as conventional industrial polystyrene.

BIOPS obtains styrene from vegetable waste without depending on agricultural plantations, thus avoiding impact on the ecosystem.

To be used in *all* our products for pools (*Splash!*).

Experience the
Mediterranean spirit

Usage recommendations and *links*

When using the products in the pool, it is recommended to remove them from the water daily, rinse them, and drain them. During use, they increase in weight due to water infiltration inside, so it may require two people to remove them.

Once the season is over, the products should be allowed to dry completely before storing them in their respective covers. This drying process can take between 4 and 7 days depending on the climate. It is an important step to prevent mold and other damages, thereby extending the product's lifespan.

Cleaning of the product

Due to their design and aesthetics, Splash! covers are not removable for cleaning. Thanks to the high quality of the 3D fabric, they can be cleaned without needing to empty them. It is recommended to remove dirt as much as possible with paper towels or a clean cloth, apply a neutral cleaning product, let it sit for a few minutes, and then remove with some water using circular motions. Only for aggressive stains, apply in the same manner a chemical product such as bleach or any product appropriate for the type of stain.

Important notes

Due to the structure of the 3D fabric, stains caused by adverse weather conditions such as sandstorms can alter the color appearance. In case of rain, it is recommended to remove the product from the terrace.

Additionally, colored sunscreens should not be applied directly onto the product. In such cases, it is recommended to use towels or remove excess oils before entering the pool to enjoy them.

Links and Downloads

On the website you can find downloads of various materials such as technical data sheets or 2D and 3D files, including the new addition of BIM files.

Product technical sheets can be located in their respective sections, where you will find dimensions and finishes.
